Profile

Student enrolled in the first-cycle academic programme in *Sound Technology* at the “O. Respighi” State Conservatory of Music in Latina, with experience in sound design, music production, recording, audio post-production and technical support for live and studio-based musical activities. The profile combines practical skills in audio chains, DAWs and studio equipment with musical programming and digital instrument development skills in environments such as Max/MSP, Pure Data, Csound and Faust. Main interests: electroacoustic music, sound synthesis, spatialisation, live electronics, sound design and the design of interactive systems for sound production and processing.

Professional experience

Dates

Occupation or position held

Main activities and responsibilities

2021–2023

Freelance sound designer and sound engineer

Freelance work carried out through the Fiverr platform as a Level 1 seller. Creation of custom sample packs, programming of presets and patches for VSTi virtual synthesizers (DIVA, Serum, Vital, Hybrid 3, Arturia V Collection, etc.), production of beats and commissioned audio tracks, editing and mixing of musical material. Ongoing collaboration with an international client for the monthly design of indexed and optimised patches featuring user-friendly interfaces, macros and custom controls, mainly aimed at techno production.

Dates

Occupation or position held

Main activities and responsibilities

2025–2026

Recording support and audio/video setup assistant

Technical support for the recording of musical events organised by the Conservatory; setup, testing and management of audio/video equipment; operational assistance during events, rehearsals and recording sessions; editing, post-production and mixing of recorded audio material.

Liceo scientifico IIS IPSAR "G. B. Piranesi" - Capaccio Paestum (SA), Italy

Skills

Audio and musical skills

Recording, editing, mixing and audio post-production; management of audio chains in studio and performance contexts; sound design; programming of presets and patches for virtual synthesizers; sound synthesis, sampling, digital sound processing and spatialisation techniques; basic knowledge of acoustics, psychoacoustics and electroacoustic music.

Audio software and production tools

Use of DAWs and audio production environments, including Cubase, Logic, Reaper, Pro Tools, Nuendo, FL Studio and Ableton Live; use of music notation software, including MuseScore and Finale; experience with virtual synthesizers, sound design tools and electronic music production environments.

Audio programming and IT skills

Advanced use of Max/MSP, Pure Data, Csound and Faust for musical programming, synthesis, audio processing and the development of interactive digital instruments. Good knowledge of Python, Git/GitHub and LaTeX; use of the Office suite and digital tools for documentation, version control and academic writing.

Personal studio and practical skills

Management and maintenance of a personal studio/home studio equipped for music production, recording, editing, mixing, sound design and electroacoustic experimentation. Experience in managing small recording sessions, with a technical role and artistic guidance in vocal and interpretative performance; configuration of complex audio routing and progressive upgrading of technical equipment.

Organisational and interpersonal skills

Management of commissions and client relationships developed through online freelance work; ability to work independently and in collaborative contexts; experience in technical support activities during musical events; interpersonal skills also developed in educational and social contexts.
